INSTITUT TEKNOLOGI BANDUNG

2022

BAB I

ALGORITMA BRUTE FORCE

Pada tugas kecil ini, digunakan algoritma *brute force* dengan deskripsi sebagai berikut:

1. Mulai dengan kata pertama yang hendak dicari dalam puzzle.
2. Menelusuri setiap huruf yang terdapat dalam word puzzle untuk mencari huruf yang sama dengan huruf pertama kata yang dicari.
3. Jika ditemukan huruf yang sesuai, lanjut dengan mencocokkan huruf kedua dan seterusnya dengan mencari ke arah Timur, Tenggara, Selatan, Barat Daya, Barat, Barat Laut, Utara, dan terakhir Timur Laut. Apabila huruf kedua ditemukan pada salah satu arah, akan diteruskan dengan mencocokkan huruf ketiga, keempat, dan seterusnya ke arah yang sama. Jika seluruh huruf pada kata tersebut telah ditemukan, pencarian ke arah mata angin setelahnya (yang belum dilalui) maupun huruf dalam word puzzle lainnya tidak perlu dilakukan. Namun, jika kata tersebut tidak ditemukan pada suatu arah, akan diteruskan pencarian ke arah setelahnya. Bila pada seluruh arah mata angin telah dicari namun tidak ditemukan, akan dilanjutkan ke langkah berikutnya.
4. Bila tidak ditemukan huruf yang sesuai, lanjut dengan mencocokkan huruf pertama dengan huruf pada word puzzle selanjutnya.
5. Jika sebuah kata telah ditemukan pada word puzzle tersebut, pencarian dilanjutkan pada langkah kedua terhadap kata selanjutnya.
6. Bila seluruh kata telah ditemukan posisinya dalam word puzzle, pencarian berakhir.
7. Setiap kali satu kata ditemukan posisinya di dalam word puzzle, ditampilkan matriks yang menunjukkan posisi suatu kata di dalam word puzzle.
8. Pada akhir program, ditampilkan waktu eksekusi program dan jumlah perbandingan huruf yang diperlukan.

BAB II

KODE SUMBER

Kode ditulis dalam Bahasa C. Berikut merupakan kode sumber yang terdapat di dalam file main.c. Kode sumber juga dapat diakses melalui Github https://github.com/rannnayy/Tucil1_13520019 atau Google Drive .

// Brute Force Algorithm for Word Puzzle Problem
// Algorithm :
// 1. Start with a word. Iterate through wordPuzzle to find the first letter of the word.
// 2. If the word's first letter is found, check for all directions for the second letter.
//    If second letter is found, continue to search letter per letter on that direction.
//    Otherwise, move to another direction. Repeat until found or all directions have
searched.
//    If not found, continue iteration through wordPuzzle. Repeat step 1.
// 3. If found, continue step 1 to another word. Repeat until all words have been found.

BAB IV

CHECKLIST

Poin	Ya	Tidak
1. Program berhasil dikompilasi tanpa kesalahan (no syntax error)	✓	
2. Program berhasil <i>running</i>	✓	
3. Program dapat membaca file masukan dan menuliskan luaran.	✓	
4. Program berhasil menemukan semua kata di dalam puzzle.	✓
